Subject: genetically engineered food
Sensitivity: Personal

Dear Mr. L. Robert Lake,

I am writing you in regards to the publics right to know what is in our food. We need to stop allowing Monsanto and other large corporations to influence (dictate?) the U.S. government. I'm asking (pleading) that it be made law that when these companies have genetically engineered our food they must be labeled as such. Personally I believe that genetically engineered food should be outlawed itself but I know that won't happen. Please, do what's right, take a stand for the American people now and for future generations. Your own children and grandchildren are part of that future. Thank you very much for time.

Sincerely,
Michael Stoick
